Professional profile

Industrial engineer with experience in fast-moving consumer goods distribution, fleet management and logistics planning. At Embol, I contribute to nationwide distribution management by standardising logistics information, developing Power BI dashboards and monitoring indicators to support operational and management decisions. I combine first-hand operational experience with data analysis and continuous improvement. I complement my work with master's studies in Data Science and Artificial Intelligence.

Applied experience

FMCG distribution · route planning (RTM) · fleet sizing · load and capacity balancing · Power BI · DAX · Power Query · KPIs · data standardisation · continuous improvement.

Advanced Excel · SQL · Python · SAP · Roadnet · Lean Six Sigma. Studies in Data Science and Artificial Intelligence and applied research into dynamic routing.

Recent experience

National Distribution Analyst | Embol S.A.

Feb 2026 — Present · Santa Cruz, Bolivia

- Standardise and manage logistics databases to improve the consistency and availability of nationwide information.
- Develop interactive Power BI dashboards for indicator monitoring and management decisions.
- Contribute to fleet management and coordinate distribution teams in SPOTS operations.
- Analyse national KPIs and identify opportunities to improve distribution processes.
- Coordinate information flows between teams to align delivery planning, execution and tracking.

Distribution Assistant | Embol S.A.

Jun 2025 — Feb 2026 · La Paz, Bolivia

- Planned and optimised routes with the Route-to-Market team to support the new delivery model.
- Developed automated Power BI dashboards to track KPIs and action records (Action Log).
- Sized the rural fleet and analysed load balancing (T2) for rural operations, modern trade and HoReCa.
- Analysed coverage, capacity and efficiency to support resource planning.

Fleet Analyst | Embol S.A.

Sep 2023 — Jun 2025 · La Paz, Bolivia

- Implemented a preventive maintenance schedule to reduce breakdowns and improve rural fleet availability.
- Optimised rural trip scheduling with a focus on coverage and delivery cost efficiency.
- Monitored dispatch and return times and identified operational improvement opportunities.
- Tracked daily settlements and transport operation processes.
- Monitored occupational health and safety guidelines and transport quality standards.

Safety and Logistics Intern | Cervecería Boliviana Nacional

Mar 2023 — Jul 2023 · La Paz, Bolivia

- Designed and implemented a traffic plan for the empty-container yard to reduce risks between people and machinery.
- Automated safety reports with Power BI to analyse information and identify critical areas.
- Ran safety awareness campaigns for the distribution fleet.
- Supported the modernisation of safety tracking and control through data analysis.

Additional experience

Product Designer | Nutrimentos Maybo S.R.L.

Aug 2021 — Jul 2022

I contributed to food product development, combining experimental design, costs and commercial feasibility assessment.

Operations Assistant & Community Liaison | Arbitriumfx

Aug 2021 — Dec 2021

I supported operations and communications at a training academy, organising activities between mentors and students.

Operations and Marketing Coordinator | Universidad Católica Boliviana

Feb 2021 — Jun 2021

I coordinated communications and operational support for social responsibility projects and institutional activities.

Projects connecting data and operations

Route balancing in La Paz and El Alto

Embol S.A. · Jun — Jul 2025

I contributed to load balancing between distribution centres and territory redesign to align operational capacity and customer service models.

Dynamic last-mile routing

UAGRM · Master’s research in progress

My applied research focuses on automating dynamic routing and connecting analytical models with practical distribution needs.
