Rodrigo Alejandro López Flores

Industrial engineer · Distribution, planning & analytics

Santa Cruz / La Paz, Bolivia +591 65562192 rodrilopez2498@gmail.com linkedin.com/in/rodrigoalejandrolópezflores24

Professional profile

Industrial engineer with experience in distribution, fleet management and route planning at Embol. I currently work on nationwide distribution analysis, standardising logistics data and developing Power BI dashboards for management reporting. I have contributed to rural fleet sizing and route and load balancing in La Paz and El Alto. I am completing a master's degree in Data Science and Artificial Intelligence, with applied research into dynamic last-mile routing.

Applied experience

Route planning (RTM) · load balancing · fleet sizing · rural distribution · preventive maintenance · Power BI · advanced DAX · Power Query · KPIs · data standardisation.

Advanced Excel · SQL · Python · SAP · Roadnet · Lean Six Sigma. Machine learning and dynamic routing through master's studies and applied research.

Recent experience

National Distribution Analyst | Embol S.A.

Mar 2026 — Present · Santa Cruz, Bolivia

- Standardise logistics databases across national operations.
- Develop Power BI dashboards for management reporting.
- Manage fleets and lead distribution teams in SPOTS operations.
- Coordinate information flows and delivery operations.
- Monitor national indicators and identify opportunities for improvement.

Distribution Assistant | Embol S.A.

Jun 2025 — Feb 2026 · La Paz, Bolivia

- Planned routes with Route to Market for the new delivery model.
- Developed automated Power BI dashboards to track KPIs and the Action Log.
- Sized the rural fleet and balanced T2 loads for high-volume provinces, modern trade and Horeca channels.

Fleet Analyst | Embol S.A.

Sep 2023 — Jun 2025 · La Paz, Bolivia

- Implemented a preventive maintenance schedule for the rural fleet to reduce breakdowns and improve availability.
- Optimised rural trip scheduling to expand coverage and reduce delivery costs per customer.
- Improved the tracking of dispatches, returns and daily settlements.
- Monitored compliance with safety and quality requirements in transport operations.

Safety and Logistics Intern | Cervecería Boliviana Nacional

Mar 2023 — Jul 2023 · La Paz, Bolivia

- Designed and implemented a traffic plan for the empty-container yard to reduce risks between people and vehicles.
- Automated safety reports with Power BI to identify critical areas.
- Ran safety awareness campaigns for the distribution fleet.

Additional experience

Product Designer | Nutrimentos Maybo S.R.L.

Aug 2021 — Jul 2022

Under a training contract, I helped develop a food product and assess its commercial viability.

Operations Assistant & Community Liaison | Arbitriumfx

Aug 2021 — Dec 2021

I coordinated activities and visual communications for an international trading academy.

Operations and Marketing Coordinator | Universidad Católica Boliviana

Feb 2021 — Jun 2021

During my internship, I supported social responsibility and institutional communications initiatives.

Projects connecting data and operations

Route balancing in La Paz and El Alto

Embol S.A. · Jun — Jul 2025

I contributed to load balancing between distribution centres and territory redesign to align operational capacity and customer service models.

Dynamic last-mile routing

UAGRM · Master's research in progress

My applied research focuses on automating dynamic routing and connecting analytical models with practical distribution needs.
